News Release

QuestAir to supply H-3200 hydrogen purifier to Korean hydrogen station

For Immediate Release

15 December, 2005

BURNABY, B.C. – QuestAir Technologies Inc. (AIM: QAR; TSX: QAR) announced today that it has received an order from Hydrogenics Corporation for a H-3200 hydrogen purifier to be installed at a hydrogen fuelling station at the Korea Gas research and development facility in Incheon, South Korea.

The KOGAS-tech (Korean Gas Technology Corporation) station will generate hydrogen fuel from natural gas. The station will be capable of producing sufficient hydrogen to refuel approximately 20 fuel cell powered vehicles.

QuestAir's H-3200 will purify hydrogen produced from natural gas, and will be integrated into a hydrogen generation and compression package supplied by Hydrogenics Corporation. This sale brings to 10 the number of units that QuestAir has placed in hydrogen refueling station applications.

Jonathan Wilkinson, President and CEO of QuestAir said that this hydrogen station is the first in Asia outside of Japan to use QuestAir's PSA technology. "We are extremely pleased that QuestAir's H-3200 hydrogen purifier is to be included in this station, the first of its kind in Korea" Wilkinson said.

QuestAir's H-3200 purifies gas streams containing hydrogen to high-purity hydrogen for use in industrial processes, hydrogen fueling stations and stationary fuel cell power plants. The H-3200's optimized Pressure Swing Adsorption (PSA) process and proprietary rotary valve technology deliver higher efficiency than conventional PSA systems in a more compact, cost-effective package. Since the product launch in 2003, QuestAir has sold more than 30 H-3200 systems to customers in Europe, Japan and North America.

About QuestAir Technologies Inc.

QuestAir Technologies, Inc. is a developer and supplier of proprietary gas purification systems for several large international markets, including existing markets such as oil refining, biogas production and natural gas processing, and emerging markets such as fuel cell power plants and fuel cell vehicle refueling stations. QuestAir is based in Burnaby, British Columbia and its shares trade on the AIM Market of the London Stock Exchange Plc. and on the Toronto Stock Exchange under the symbol "QAR".

Forward-looking statements

Certain statements in this press release may constitute “forward-looking” statements which involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. When used in this press release, such statements use such words as “anticipate”, “believe”, “plan”, “estimate”, “expect”, “intend”, “may”, “will” and other similar terminology. These statements reflect current expectations regarding future events and operating performance and speak only as of the date of this press release. Forward-looking statements involve significant risks and uncertainties, should not be read as guarantees of future performance or results, and will not necessarily be accurate indications of whether or not such results will be achieved. A number of factors could cause actual results to differ materially from the results discussed in the forward-looking statements.
