### **QuestAir refinery program with ExxonMobil Research and Engineering passes Exxon review**

#### **For Immediate Release**

**24 April, 2006**

VANCOUVER, B.C. – QuestAir Technologies Inc. (AIM: QAR; TSX: QAR) announced today that its program with ExxonMobil Research and Engineering (“EMRE”) to develop a large capacity hydrogen purifier for use in oil refineries and petrochemical plants has passed a critical internal Exxon Mobil program review.

The review recommended funding for the construction and testing of a prototype pressure swing adsorption (“PSA”) system at an Exxon Mobil refinery. QuestAir expects to receive a final purchase order covering these items, with an approximate value of US\$2 million.

Jonathan Wilkinson, President and CEO of QuestAir, said that the Company has been working with ExxonMobil Research and Engineering since 2003 to develop a large capacity PSA system for use in oil refineries and petrochemical plants.

“Demonstration of the prototype PSA plant at an Exxon Mobil refinery is planned to start in the second half of 2006, and we expect to begin jointly marketing the product to refineries around the world beginning this year,” Wilkinson said.

#### **About QuestAir Technologies Inc.**

QuestAir Technologies, Inc. is a developer and supplier of proprietary gas purification systems for several large international markets, including existing markets such as oil refining, biogas production and natural gas processing, and emerging markets such as fuel cell power plants and fuel cell vehicle refuelling stations. The Company has joint development agreements with Exxon Mobil Research and Engineering Company and Shell Hydrogen, and a collaboration with FuelCell Energy. QuestAir is based in Burnaby, British Columbia and its shares trade on the AIM Market of the London Stock Exchange Plc. and on the Toronto Stock Exchange under the symbol “QAR”.
